Reflection

Yihang Wang

March 2020

1 In retrospect, what could you have done better to reduce the time you spent solving this assignment?

Read the lecture nodes more carefully, know the knowledge before assignment and try to get on well with assignment early to enjoy the advantage of office hours.

2 What could the Principles of Software staff have done better to improve your learning experience in this assignment?

Give more clear example and maybe give some advice for our homework to help us know the direction we need to work toward on :)

3 What do you know now that you wish you had known before beginning the assignment?

How to test, how to think a class before I get started it.
